Procedure to knock out faucet holes on granite countertops.

1. First make sure how many holes are required for faucet.
2. Do not proceed if not sure.
3. Locate location of faucet hole on top (finished surface) of countertop.
4. Lightly tap with hammer till knockout falls through.
5. Never do this from the bottom up, always do this from the top down.
6. Lightly tap around the top edge of the hole to clean out any material that did not come out with the knockout.
7. See drawing on bottom.
